SR http get
Tech-doc

Introduction

Status Reports (SR) or delivery receipts of mobile network operators can be delivered on your URL using HTTP get. Default parameters can be included, please find an overview below.

HTTP get

Example string:

`http://www.yoursite.com/receivestatus.asp?recipient=00316xxxxxxx&reference=xxxxxx&status=delivered`

SR Parameters:

Name	Format	Length	Description
Recipient	Numeric		Mobile user's MSISDN
Status	Alphanumeric		Status: * accepted: message has been accepted by the operator's SMSC. * canceled: message is canceled by the CM SMS gateway. * rejected: message is canceled by the operator's SMSC * failed: message not received on handset. * delivered: message successfully received on handset.
Date*	Datetime		Date of reception by the CM SMS gateway.
Time*	Datetime		Time of reception by the CM SMS gateway.
Reference	Alphanumeric	1-256 characters	Your own reference.
